## Holostik India Ltd

Holostik is a global leader in anti-counterfeiting and authentication solutions, renowned for its unwavering commitment to innovation and technology. With over 30 years of experience, 450+ dedicated employees, and a presence in 90+ countries, we have earned the trust of 10,000+ satisfied clients across various industries.

Our strategic focus on innovation, technology, values, and sustainability has positioned us as a trusted provider of anti-counterfeiting solutions. From FMCG to Pharmaceutical, our solutions secure supply chains for renowned brands worldwide. Recognized with prestigious industry awards from FINAT, LMAI, CII and others, our dedication to excellence is further underscored by partnerships with organizations like IHMA and ASPA.

As the only DSIR-certified anti-counterfeiting company in India, and with industry certifications including CMMI level 3 and ISO certifications, we uphold the highest quality standards. At Holostik, we are dedicated to protecting the value of our partners' brands and fostering a more secure world through cutting-edge solutions and unwavering integrity.

Discover Holostik's journey in an exclusive interview with our JMDs, Mr. Ankit Gupta and Mr. Shobhit Gupta. They share insights on our innovative anti-counterfeiting solutions aimed at authenticating supply chains, protecting brands & saving lives.

**LABELLING AND PACKAGING SOLUTIONS**

**DIGITAL SOLUTIONS**

## Our Solutions

### Anti-counterfeiting Solutions

Veritech introduces revolutionary Nano-Optics OVD Technology for the first time in India. Our state-of-the-art manufacturing facility with ultra-advance technologies like 4PICO from Netherlands ensures stunning visual effects and unparalleled security features.

### Packaging and Labelling Solutions

We offer advanced labelling and packaging solutions, seamlessly integrated with anti-counterfeiting technologies. Utilizing world-class flexo and digital printing, we deliver flawless results every time, while our auto inspection systems ensure impeccable print quality.

### Digital Solutions

Under the Veritech+ umbrella, we offer tailored digital solutions on a turnkey basis, addressing enterprise and consumer engagement needs from origin to consumption.

# FASICULUS

## Fasiculus India Pvt Ltd

We are a Packaging, Labelling & Print technologists, Supply Chain, Manufacturing, Procurement veterans, Security authentication, Experts and Coders. We have been providing technology, equipment & consumables to the industry for decades, giving us unparalleled insights to help in Optimization & Digitization. We provide printing, packaging, and labelling to the Pharmaceutical and FMCG industries.

We have relentlessly removed costs from products and packaging year on year for some of the most efficient companies in the world.

We provide an innovative authentication, identification and tracking technologies. Our core security solution is powered by award winning technologies with > 150 patents. Our technology currently generates > 6 Billion security labels every year. We have now put together the 1st Packaging & Labelling industry blockchain for products & brands.

### **Avery Dennison India Pvt. Ltd.**

Avery Dennison began with an innovation that launched an industry. In 1935, a struggling clerk named Stan Avery conceived a smarter way for stores to price their products. Combining used machine parts with a saber saw—and financing it all with a hundred-dollar loan—he created and patented the first self-adhesive, die-cut labeling machine. With Stan Avery’s invention, the pressure-sensitive label industry was born. **Jekson Vision Pvt Ltd**

We specialize in providing cutting-edge vision inspection (Blister inspection, Tablet inspection, Barcode & OCR Readers, Pin Hole detection and Vial Inspection) along with traceability (serialization & aggregation) solutions tailored for various industry that empower industries to achieve the highest levels of quality control and productivity.

With our expertise in machine vision, artificial intelligence, and automation, we deliver customized solutions that optimize manufacturing processes and ensure flawless product integrity.

## PharmaSecure®

### PharmaSecure

PharmaSecure is a global leader in pharmaceutical supply chain traceability, serialization, and patient engagement. With decades of experience implementing international pharmaceutical regulations, PharmaSecure has protected billions of packages through its technology-driven solutions.

The company designs robust, secure, and scalable hardware and software systems that strengthen supply chains, safeguard brands from counterfeit threats, and create value through meaningful patient engagement and improved health outcomes.

Our proven serialization capabilities empower some of the world's largest pharmaceutical companies to meet stringent traceability requirements. Today, products coded by PharmaSecure are exported to over 50 countries worldwide.

Continuing its mission to protect brands and ensure medicine authenticity, PharmaSecure has introduced a patented, non-cloneable digital solution — setting a new benchmark in brand protection technologies.

## Holo Security Technologies

Holo Security Technologies is a fast growing name in the industry of Holograms. We are ISO 9001:2008 certified company offering cost effective solution for brand protection and brand promotion. Our product line includes holographic labels, holographic security holograms, advanced hologram, holographic products, hot-stamping holograms, holographic tapes and many more. In addition to all these, we are also expert in customizing the holograms as per the client's requirements. There have been some additions in our product line- holographic ID Overlay, Holograms for Pharma sector and Holographic machinery. We have been a company who has popularized the use of 3D custom holograms in market. We are working with a mission to offer our global clients the latest and the most advanced solutions in holography.

### Acviss Technologies Private Limited

Global supply chains are losing trust due to counterfeiting, pilferage, and inventory issues, undermining brand credibility and customer confidence. Every year, over \$3 trillion worth of counterfeit goods flood the market, further compounding these challenges. Founded in 2020, Acviss is on a mission to restore trust in the supply chain through comprehensive brand protection and traceability solutions. Trusted by over 80 brands worldwide, Acviss's solutions ensure product authenticity and safeguard brand reputation both online and offline. Acviss secures more than 2 billion products with its patented, AI- and blockchain-powered, tamper-proof, non-cloneable technology. Acviss's multi-product suite covers the full spectrum of brand protection and track-and-trace, addressing challenges from physical supply chain security to digital counterfeit monitoring. With a 43% YOY growth rate, Acviss is continually expanding its impact in the market.

## Kurz India

Kurz India is a leading provider of advanced surface finishing, security, and traceability solutions, serving diverse industries across India. As part of the globally renowned LEONHARD KURZ Group, Kurz India brings world-class expertise in decorative and functional coatings, delivering innovation that enhances brand value, product authentication, and supply chain transparency.

At TAF Connect 2026 – Mumbai, Kurz India proudly showcases its comprehensive portfolio in security and traceability technologies designed to protect brands and enable seamless verification. Our solutions integrate overt, covert, and digital security features that support authentication, track-and-trace systems, and smart consumer engagement. These advanced technologies empower industries such as pharmaceuticals, FMCG, textiles, automotive, and industrial packaging with reliable protection and enhanced compliance.

A key highlight of our offering is our Thermal Transfer Ribbon (TTR) portfolio—engineered for high-definition, durable printing across labels, flexible packaging, and industrial coding applications. Kurz India's TTR solutions enable precise batch coding, serialization, barcoding, and variable data printing, ensuring efficient traceability and operational excellence across supply chains.

Driven by innovation, sustainability, and customer-centric development, Kurz India partners with brand owners, converters, and manufacturers to deliver tailored, future-ready solutions. With advanced technology infrastructure and a strong service network, we continue to lead in secure decoration and intelligent authentication systems.

## Link smart Technologies Pvt Ltd

LINKSmart is celebrating its journey of 6 billion plus non clonable impressions. Among its active IP portfolio in multiple international jurisdictions, non clonable printing needs special mention that is empowering supply-chain with new level of credible traceability for labeling/printing/packaging. Currently industries struggle with stop-gaps all around. Multiple attempts have been made in different part of world to achieve deployable non clonable printing technologies but those have not been very successful. Now the story is changing. Our unique non clonable printing offers fastest scanning along-with capability to underwrite performance liability.

Performance liability is a unique proposition - it commits hard engineering guarantee against duplication in public domain for every impression piece-by-piece. Paradigm of print anywhere with standard print-lines without any additional setup is enabling new opportunity in underserved market. Converters can offer value-added offerings and customers are empowered to save significant hidden legal cost on ground investigation. Even in-house prints by end-of-line printers can be transformed to non clonable without new capex and thus enabling transformation of serialization to non clonable serialization. Our offerings are based on four foundational pillars and those being “security with performance liability”, “sustainability”, “usability” & “cost-effectiveness”
